NEWS FOR EVERYONE: AGENTIC MULTILINGUAL NEWSROOM

Kaleva Tasku: Visuaalinen Uutisspalvelu ja Arjen Tulkki

A community-driven, agentic civic newsroom that bridges 125 years of Kaleva's trusted journalism with zero-translation situational ergonomics for Oulu's international population.

- 🤖 Autonomous 3-Agent Editorial Pipeline
- 📐 Zero-Translation Situation Diagrams
- ⚖️ 100% JSN Code of Ethics Verified
- ❄️ Arctic Ergonomics (Korva Audio)

Oulu's International Community is Cut Off in Crises

5,000+ university students, Nokia ICT engineers, and seasonal workers live in an information vacuum.

❄️ 🚨

1. Panic & Misinformation

When transit freezes at −25°C or sirens blare at Valkea mall, non-Finnish speakers cannot read local news. They default to anonymous WhatsApp groups and Jodel, where unfounded panic, scams, and dangerous rumors spread unchecked.

🌐 ❌

2. Raw Translation Fails

Standard tools like Google Translate translate literal words but fail on Finnish civic reality. Words like *Pääkallokeli*, *Baana*, *PSOAS*, or *Kela* carry critical legal, safety, and cultural meanings that raw machine translation distorts.

📉

3. Media Churn & Disconnect

Traditional Nordic broadsheet subscriptions do not fit Gen Z and international demographics. Without accessible onboarding, newcomers remain isolated, and regional publishers lose an entire generation of future readers.

💡 **The Solution Mandate:** We must deliver verified, life-critical civic facts in seconds without requiring language fluency, while strictly upholding the 125-year editorial integrity of Kaleva.

The Dual-Engine Solution: Tasku + Broadsheet 1899

Instant visual ergonomics for mobile readers, seamless depth for traditional journalism.

Engine 1: Mobile Tasku View

ZERO-TRANSLATION UX

Visual situation micro-cards designed for sub-zero Oulu conditions. Features the orange newsroom masthead («KALEVA TASKU • La 24.10.2026»), monochromatic line-art diagrams (Problem ➔ Salad-Green Arrow ➔ Solution), and one-touch civic actions.

Engine 2: Classic Broadsheet 1899

Editorial Authority

One click on the headline expands into an authentic multi-column newspaper view with deep editorial reporting, journalist bylines, and official JSN § 10 ethics accreditation. We never dumb down journalism.

Arctic Ergonomics: Korva Audio Stream (30s)

At –20°C at an Oulu bus stop, bare fingers freeze in 40 seconds. A single click on the grey «(30s)» badge streams a high-clarity 30-second audio summary directly into earbuds so gloves stay on.

Engine 1: Tasku Card

Engine 2: Broadsheet 1899

Four Breakthroughs for Multilingual Civic Safety

Moving from passive text translation to active situational empowerment.

1. Digital Situation Diagrams

Zero generic stock photography. Each card features an SVG situation diagram mapping the exact problem on the left (e.g., Highway 4 snow collision 🚗💥), an arrow, and the immediate bypass route on the right (Kaakkuri interchange ➔ 45 min clear).

2. Interactive Civic Glossary

Finnish institutions and winter concepts (`PSOAS`, `Kela`, `Baana`, `Pelastuslaitos`) are highlighted. Clicking opens a bottom drawer explaining the plain-language definition, cultural rationale, statutory law anchor, and advice.

3. Actionable Everyday Solutions

News should resolve anxiety, not cause it. Every card terminates in an actionable solution button: open live OSL bus tracking, download the international tenant rights legal guide, or register for student-free Kärpät hockey tickets.

4. AI Incompetence Boundary

If user queries touch criminal threat, domestic abuse, or passport confiscation, the agent halts AI text generation immediately. It surfaces emergency legal hotlines (Police 112, Crime Victim Emergency 116 006, Occupational Safety). Zero hallucinations on life safety.

The 3-Agent Editorial Pipeline + Human Cockpit

Automating verification and cultural translation without bypassing the Council for Mass Media (JSN).

AGENT 1: RADAR

Tutkija (Investigator)

Monitors civic live feeds (api.ouka.fi, Fintraffic, Kaleva RSS, community tips). Automatically strips personal data (GDPR) and geo-tags events to Oulu districts (Tuira, Linnanmaa, Kaukovainio).

AGENT 2: ETHICS AUDITOR

JSN Auditor (Math of Trust)

Evaluates facts with open, mathematical verification:

- **+40%**: Match with official 112 / rescue DB
- **+35%**: Corroborated by 3 geotagged witnesses
- **−15%**: Penalty for unverified anonymous source

AGENT 3: DECODER

Toimittaja & Cultural Decoder

Explains Finnish institutional norms. E.g., clarifies that 3 fire trucks responding to Valkea mall for burned bakery smoke is standard Finnish building protocol, not a security crisis.

Human-in-the-Loop Editorial Cockpit

No story is published autonomously. Kaleva's editor retains final oversight with a 1-click verification queue complying with JSN § 10 & § 20.

✓ JSN § 10 TRUTH ACCREDITED

B2B Institutional SaaS: €114,000 Annual Revenue

We do not burden low-income students. Institutions that depend on international safety pay the license.

Institutional Partner	Strategic Incentive	Annual ARR
University of Oulu & OAMK	Prevents international student dropout, isolation & safety crises	€35 000
Nokia & ICT Corporates	Turnkey expat civic onboarding integrated into corporate Slack	€25 000
Oulu 2026 Foundation	Civic safety & cultural guide for 300 000 European visitors	€40 000
Lapland Tourism Consortia	Seasonal worker protection in Levi and Ruka winter hubs	€14 000
TOTAL PROJECTED REVENUE	**Annual Recurring Contracts**	**€114 000**

Lean Operational Costs: €18 240 / year

- LLM inference & hosting APIs: €2 640 / yr
- Student fact-checker verification pool: €14 400 / yr
- Maintenance & data feed relays: €1 200 / yr

UNIT ECONOMICS & BREAKEVEN

84.0% Gross Margin

A single institutional contract (e.g. University of Oulu) fully finances the entire operation from Day 1.

Ready for Oulu 2026: Connecting Everyone

Built with production-ready technology and grounded in northern culture.

Team: Oksana & Vinod

Multidisciplinary execution combining Nordic UX design, full-stack React/TypeScript engineering, and agentic media architecture.

Production Tech Stack

- Frontend: React 18, TypeScript, TailwindCSS
- Arctic Voice: Web Speech & Edge Speech API
- Newsroom Backend: Multi-agent verification pipeline
- Open Data: api.ouka.fi & Fintraffic relays

Oulu 2026 Pilot

Ready for deployment alongside the European Capital of Culture kickoff. Ensuring no student, worker, or traveler in the North is left in the dark.

«News for Everyone» isn't just about language — it's about belonging.

Kaleva Tasku makes Oulu's cold winters warm, safe, and navigable for all residents.
